AUTHOR INDEX

Alford, William C., 62
Allfrey, V. G., 368
Bahn, Robert C., 103
Bangle, Raymond, Jr., 62, 95, 291, 300
Bloom, David, 178
Carlstrom, D., 149
Chessick, Richard D., 122, 258
Cohen, Richard B., 209
Dalton, A. J., 366
Daly, M. M., 368
Datta, N., 115
Defendi, Vittorio, 248
Dempsey, Edward W., 9
De Robertis, Eduardo, 340
Elftman, Herbert, 1
Engle, Ralph L., Jr., 9
Eränkö, Olavi, 167
Feldman, Donald, 333
Fisher, Edwin R., 81, 95
Glick, David, 103, 178
Goldstein, Milton N., 274
Gomori, George, 50
Hodge, Alan J., 54
Hokin, Lowell E., 387
Hokin, Mabel R., 387
Huxley, Hugh H., 54
Kaufmann, Berwind, 379
Keigler, Norma M., 233
Keller, Elizabeth B., 370
Koenig, Harold, 333
Kramer, H., 196
Lillie, R. D., 81, 95, 127, 300
Loftfield, Robert B., 370
McDonald, Margaret R., 379
Mirsky, A. E., 368
Nayyar, Som N., 282
Novikoff, Alex B., 393
Pearson, Bjarne, 248
Petermann, Mary L., 367
Podber, Estelle, 393
Porter, Keith R., 347
de Robertis, Eduardo, 340
Rosa, Charles G., 110
Rutenburg, Selma H., 209
Ryan, Jean, 393
Scherer, William F., 178
Seligman, Arnold M., 29, 209
Sidman, Richard L., 413
Singer, Marcus, 322
Smith, Andrew G., 233
Spiro, David, 54
Swigart, Richard H., 178
Sylvén, B., 115
Tandler, C. J., 165
Tsou, Kwan-Chung, 29, 209
Velardo, Joseph T., 110
Wachstein, M., 137
Weiss, Jules, 21
Weiss, Leon P., 29
Wilson, J. Walter, 317
Windrum, G. M., 196
Wislocki, George B., 413
Zajicek, J., 115
Zamecnik, Paul C., 370

SUBJECT INDEX

Acetylcholinesterase in blood and marrow, 115
Acid phosphatase, azo dye method, 88
Adrenal, ascorbic acid in, 103, 167
Aldehydes, Schiff and silver reactions, 127
Alkaline phosphatase in testis, 137
Amino acid uptake and microsomes, 370
Amino groups, protein bound, 29
Announcements, 80, 315
Argentaffin component of nucleolus, 165
Argentaffin reaction and aldehydes, 127
Ascorbic acid: critique of silver method, 167
Ascorbic acid distribution in adrenal, 103
Ascorbic acid in adrenal, 167
Bacillus cereus spores: effect of enzymes, 233
Basophil components, staining, 322
Basophilia, effect of methylation, 81
Basophilia of keratin after disulfide cleavage, 95
Basophilic components of cytoplasm, 317
Blood cells, acetylcholinesterase, 115
Bone marrow, acetylcholinesterase, 115
Book reviews, 314, 407
  D. Burk: Cell Chemistry, 314
  J. N. Davidson: Biochemistry of Nucleic Acids, 314
  P. Gray: Microtomist's Formulary and Guide, 407
  R. O. Greep: Histology, 407
  R. D. Lillie: Histopathologic Technic, 407

Brain, effect of coma on enzymes, 122
Business meeting of the Society, 434
Cholinesterases: histochemical specificity, 258
Chromation, controlled, 1
Collagen, chemical basis of periodic acid Schiff, 62
Coma, effect on brain enzymes, 122
Cytoplasmic nucleoprotein of cultured neurons, 333
Dehydrogenase, succinic in sections, 110
Desoxyribonucleic acid in monocytes and giant cells, 274
Disulfide cleavage and basophilia of keratin, 95
Dithizone reaction for zinc in pancreas, 185
Elastin, orcein reaction nature of, 21
Electron microscopy of basophilic components, 347, 366
Electron microscopy of nerve cells, 340
Enterochromaffin, histochemistry, 50
Ergastoplasm of invertebrate nerve cells, 340
Esterases and coma in brain, 122
Freeze-dry effect on cytology by phase contrast, 178
Giant cells: desoxyribonucleic acid content, 274
β-D-Glucuronidase demonstration, 209
Glycine uptake by liver protein, 368
Hair cortex, peracetic azure A reaction, 95
Hair cortex, peracetic Schiff reaction, 300
Histochemical Titles from Current Literature, 77, 161, 230, 312, 400, 487
Insulin, periodate consumption, 62
Invertebrate nerve cells, 340
2-(p-Iodophenyl)-3-(p-Nitrophenyl)-5-phenyl tetrazolium chloride for succinic dehydrogenase, 248
Keratin, oxidation cleavage of SS bonds, 95
Liver protein uptake of N^{15} glycine, 368
Metachromasia after sulfation, 196
Metachromasia, oxidative disulfide cleavage of keratin, 95
Methylation, effect on basophilia, 81
Microsomes and protein synthesis, 370
Microtome for ultrathin sections, 54
Monocytes: desoxyribonucleic acid content, 274
New Members, 315
Nucleolus, argentaffin component of, 165
5-Nucleotidase in testis and seminoma, 137
Orcein chromatography, 9
Orcein elastin reaction, nature of, 21
Orcein fractionation and staining, 9
Pancreatic islets: zinc dithizone reaction, 185
Paraldehyde fuchsin, chemical and staining properties, 291
Peracetic acid Schiff reaction of hair, 300
Periodic acid Schiff reaction of collagen, 62
Phosphamidase in brain in coma, 122
Phosphatase, acid, azo dye method, 88
Phosphatase, alkaline, in testis, 137
Phosphatases and coma in brain, 122
Proceedings of the Histochemical Society, 434–486
Speaker Index, 485
Protein determination in mμg quantities, 282
Retina, histochemistry of rods and cones, 413
Ribonuclease action on heterologous substrates, 379
Ribonuclease action on liver homogenates, 393
Ribonuclease action on microsomal enzymes, 393
Ribonuclease and ribonucleic acid synthesis, 387
Rods and cones, histochemistry, 413
Scientific Proceedings of the Society, 435–486
Seminoma, phosphatase and 5-nucleotidase, 137
Spores, bacterial; enzyme effect on, 233
Staining of basophilic components, 322
Succinic dehydrogenase in sections, 110
Succinic dehydrogenase, new tetrazolium technic, 248
Sulfation and metachromasia, 196
Symposium: Basophilic components of cytoplasm, 317–398
Testis: 5-nucleotidase and phosphatase, 137
Tetrazolium (2-(p-iodophenyl)-3-(p-nitrophenyl)-5-phenyl), 248
Ultrathin sectioning, 54
X-ray diffraction in histochemistry, 149
Zinc-dithizone reaction of pancreas, 185
